

CONTROLLED — VALIDATION

Authorized Physical Security Assessment Report

Authorized Physical Security Red Team Assessment

Client	Validation Client
Assessed site	Validation Site
Assessment dates	2026-08-25 to 2026-08-25
Revision	A · DRAFT

Handle according to the Rules of Engagement and client direction.

Prepared by Validation Analyst · Assessment Lead

Executive Summary

This authorized assessment evaluated the effectiveness of physical security controls and documented defensible remediation priorities.

Scope & Authorization

The assessment covered the authorized Validation Site and excluded all areas not explicitly listed in the Rules of Engagement.

Engagement status	COMPLETE
Authorization reference	VAL-AUTH-001
Authorization authority	Validation Authorization Authority
Authorized facilities	Validation Site
Authorized areas	Public lobby and authorized test zone
Excluded areas	All other areas
Allowed hours	0800–1700
Stop-work conditions	Any safety concern, emergency, or client stop request.

Methodology

Testing followed the approved scope and Rules of Engagement. Conclusions are traceable to documented tests, observations, and preserved evidence.

Site Overview

The Validation Site represents the authorized physical environment used to verify report-governance workflows.

Hierarchy records: 1 · Buildings: 0 · Zones: 0 · Assets: 0

Security Architecture

The assessment considered perimeter, building-envelope, access-control, detection, response, and protected-asset layers.

Domain	Controls
No records.	

Assessment Coverage

0 tests planned; 0 attempted; 0 completed. 0% of inventoried controls have a conclusive result with sufficient evidence; 0% of attempted tests have linked evidence.

Coverage objective	RISK-BASED SAMPLE
Sampling basis	Risk-based validation sample covering the authorized control and location.
Sampling limitations	Results apply only to the authorized scope, time, and evidence available during testing.
Open blocking gaps	0
Analyst sign-off	Current sign-off

Assurance Disclosures

Accepted assessment limitations

No assessment limitations have been formally accepted.

Outstanding assurance review items

No active assurance review items remain.

Analyst sign-off: Current sign-off · Validation Assessment Lead · Assessment Lead · 8/25/2026, 5:13:53 AM

Assurance fingerprint: 5229a5b5e7f984cb00000a25

Findings

No reportable findings are recorded.

Positive Observations

No formal positive observations are selected for reporting.

Defense in Depth & Control Chains

No validated control chains are selected for reporting.

Remediation Priorities

0 overdue item(s); 0 in progress; 0 verified or accepted.

Finding	Severity	Priority	Owner	Target	Status
No records.					

Formal Retesting

Remediation and Formal Retesting

Remediation Submissions

No remediation submissions are available for reporting.

Formal Retests

No independently reviewed retest records are available for final reporting.

Baseline Comparison & Regression Analysis

No reviewed baseline comparisons are available.

Assessment Limitations

Results apply only to the authorized scope, time, and evidence available during testing.

Conclusion

The assessment documented control performance and established prioritized actions for remediation and formal retesting.

Appendices

Appendix — Test Log

Test	Title	Control	Location	Result	Started	Ended
No records.						

Appendix — Observation Register

Observation	Timestamp	Observer	Location	Description	Test
No records.					

Appendix — Evidence Index

Evidence	Filename	Type	Designation	Collector	Location	Integrity	SHA-256
No records.							

Appendix — Photo Log

No selected photographs.

Appendix — Coverage Matrix

Control	Location	Test	Result	Evidence	Finding
No records.					

Appendix — Rules of Engagement

Rule / Authority	Recorded Requirement
Authorization reference	VAL-AUTH-001
Sponsor	Validation Sponsor
Authority	Validation Authorization Authority
Authorized facilities	Validation Site
Authorized areas	Public lobby and authorized test zone
Excluded areas	All other areas
Authorized techniques	Observation and approved access-control validation
Prohibited techniques	Destructive methods and all unapproved activity
Allowed hours	0800–1700
Restricted hours	Outside authorized hours
Personnel interaction rules	Use anonymized identifiers and follow the approved script.
Photography restrictions	Photography allowed only within the authorized test zone.
Recording restrictions	Audio and video recording require explicit approval.
Safety restrictions	Stop for any unsafe condition.
Stop-work conditions	Any safety concern, emergency, or client stop request.
Escalation	Contact the authorization authority.
Law-enforcement notification	Client coordinates notifications.
Evidence handling	Store locally, preserve originals, and distribute only controlled report packages.

Appendix — Formal Retest Register

Retest	Finding	Status	Result	Tester	Reviewer	Completed
No records.						

Appendix — Control Chains

Chain	Title	Status	Entry	Protected asset	Confidence
No records.
